

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## Source Book for the Economic Geography of North America

By CHARLES C. COLBY

Assistant Professor of Geography, the University of Chicago

The fundamental idea of the book is to make available to the busy teacher the material on this subject which is scattered widely through literature. The course which has been given for a number of years at the University of Chicago has resulted in the collection and organization of the material most suitable for the purpose.

The book contains short magazine articles and materials from Canadian, Mexican, and United States government publications. The selection of the material has been governed by the concept that there is a direct relation between the environment and the economic activities of the region. The author aims to survey the different sections of the country from the viewpoint of industrial opportunity. It is thought that this collection of materials will make possible the development of courses in this important subject.

8vo, cloth; 419 pages, \$4.00, postpaid \$4.15
